

TOMORROW'S *scientists* TODAY...

formula for the future!

TODD MERCER and MIKE MACISAAC (Cape Breton)

Todd Mercer and Mike MacIsaac are students at Riverview High School in Coxheath, Nova Scotia. For their science fair project, Todd and Mike experimented with alternatives to the use of crutches. Their conclusion: the "Alter-Leg": a convenient and safe device that supports a broken leg while it heals and significantly reduces the time required on crutches. Todd and Mike earned a Silver Medal in Engineering, the S.M. Blair Family Foundation Award and a University of Western Ontario Scholarship for their project at the Canada-Wide Science Fair in Truro. They are young Nova Scotians celebrating science and discovery. Congratulations Todd and Mike!
